

ASPHALT IN A BAG

DESCRIPTION:

Asphalt in a Bag is a ready to use pre-mix bituminous mixture, manufactured from selective aggregates, bitumen and a co-polymer creating a tenacious bonding material for permanent use and repairs.

Asphalt in a Bag is an all weather road repair solution. It can be applied at -26°C and will perform just as well during hot and rainy days at temperatures reaching 49°C .

SIZES:

20 kg bags (50 bags per pallet)

Step 1
Remove all loose debris from the pothole if possible.

Step 2
With a shovel apply mix directly into the hole.

Step 3
For results tamp or roll the mix into the freshly repaired area.

Step 4
Once applied the repaired area can be exposed to traffic immediately due to the tenacious bond of the instant pothole repair patch.

FEATURES & BENEFITS:

Asphalt in a Bag is a permanent repair solution because of its ability to expand and contract with the roads surface.

The curing process for **Asphalt in a Bag** is activated by impact.

Asphalt in a Bag will bond to asphalt, concrete, Steel and even wood.

Asphalt in a Bag can be stored for long periods of time in a bagged or un-bagged state.

Asphalt in a Bag can be used in any weather conditions and also to wet areas such as potholes full of water.

NO pre-coating or tack coating is required with **Asphalt in a Bag**.

Asphalt in a Bag application is 5 times faster than the average solution which can be exposed to traffic immediately.
