

BIYSEAL GROUTING FOAM

DESCRIPTION:

Biyseal Opencell Grouting Strips are manufactured from a firm opencell polyurethane foam with an adhesive backing for easy application.

SURFACE PREPARATION:

Before applying, the surface should be clean, moisture and dirt free.

APPLICATION:

Cut the piece to required length and remove backing paper. When joining the product, butt join as close as possible to avoid leaks.

USES:

- controlling grout leaching
- Controlling depth of sealant/grout in concrete joints
- Expansion wall joint
- precast

STANDARD SIZE:

Strip: 30mm x 30mm x 2m

Donut: 115mm mod x 60mm id
x 40mm thick
(other sizes manufactured to order)
