Product: Hydrotite Waterstop

Description:

Hydrotite is a premium grade, water swellable waterstop for use in cast in-situ concrete where watertight integrity is the primer issue

Applications:

Sewerage and water treatment plants

Pipe penetrations

Swimming pools

Basements

Reservoirs

Tunnels

Pits

Benefits:

Self Adhesive for easy installation

Co-extruded design meaning expansion is directed across the joint for maximum seal

Delay coating to assist prevention of premature expansion

Unaffected by repeated wet and dry cycles

No on site welding usually required for traditional PVC waterstop

Simple butt join intersections

Can be joined to traditional PVC waterstop

No compaction or displacement problems

Non toxic and non hazardour

Standard Sizes:

10mm x 20mm x 10 metre roll
(5 rolls per carton)
